- **ProCreate**
- **Unreal Engine**

Work Experience

04/07/2022 – 19/09/2022 – Msida Malta

WEB DESIGNER- PLACEMENT – MITA -FACULTY OF ENGINEERING UNIVERSITY OF MALTA

As a Web Designer, my first task was to research brand manuals to get an idea of what would be required
of me, I was later tasked with updating an old website, and even later on in mid-Summer, I was tasked with
building one from scratch using the software "Word Press 7 Theme". See link below:

https://icecapsystems.com/

12/07/2021 – 21/09/2021 – Valletta, Malta

DESIGNER - PLACEMENT – MITA - MALTA TOURISM AUTHORITY

My role here was as a designer of flight patterns of drones. We had the task of building these flight patterns
for multiple drones that would later be flown together to create a drone light show for tourist/guest events.
My task was also to identify appropriate drawing software such as Krita, that would be incorporated in the
drone flight software.

WAITER – CAPO CRUDO RESTAURANT
Washing Dishes
Cleaning & Washing Dishes
Serving People

Recommendations

ANDRE' MICCALLEF – Assistant Lecturer, Electronic Systems Engineering,
Mr. Daniel Pace joined our research group through the MITA internship programme. He successfully
completed 330 hours from July till September of this year, as part of the ICECAP project, which was funded
by the MCST Technology Development programme.
Amongst other responsibilities, he was tasked with researching and contributing towards the project's
brand
and marketing strategy. He also contributed towards building the project's website using WordPress.
Daniel is an agreeable person, capable of working well with his superiors and workmates. On numerous
occasions he demonstrated a very good work ethic, and integrated well with his peers, both inside and
outside the office.
I therefore recommend Mr. Daniel Pace. If any further details are required, please feel free to contact me
on
(+356) 7963 0101 or andre.micallef@um.edu.mt.
